GREENLEAF PLACE SINGAPORE

Product Introduction

BELIFT emphasis in bringing exceptional ride comfort, and safe experiences. HES-6800 achieve these by using a state-of-the-art gearless motor and inverter.

Ideal for private villas, landed properties and compact shaft requirements.

Our passion for designing cabins combine innovative class and unparalleled functionality.

Key Features

Home Use

Single/Adjacent /Through Car Entrance

Automatic Rescue Device

0.63 m/s or 1.00 m/s

Superior ride comfort

Boundless styling options available

UPPER CHANGI ROAD EAST
SINGAPORE

Key Components

MONADrive GEARLESS TRACTION MACHINE

Are highly efficient, compact, and require less maintenance due to fewer moving parts. They operate smoothly and quietly. Their space-saving design allows for machine-room-less setups.

MONARCH CONTROLLER

Is a compact elevator controller, widely adopted in the industry, combines the inverter and main control board, elevates the riding experience through enhanced performance and a sleek design.

ESHINE Elevator Door Systems

Offers customizable, comprehensive elevator door systems that ensure functionality, safety, and aesthetic appeal.

Smart Lift Technology

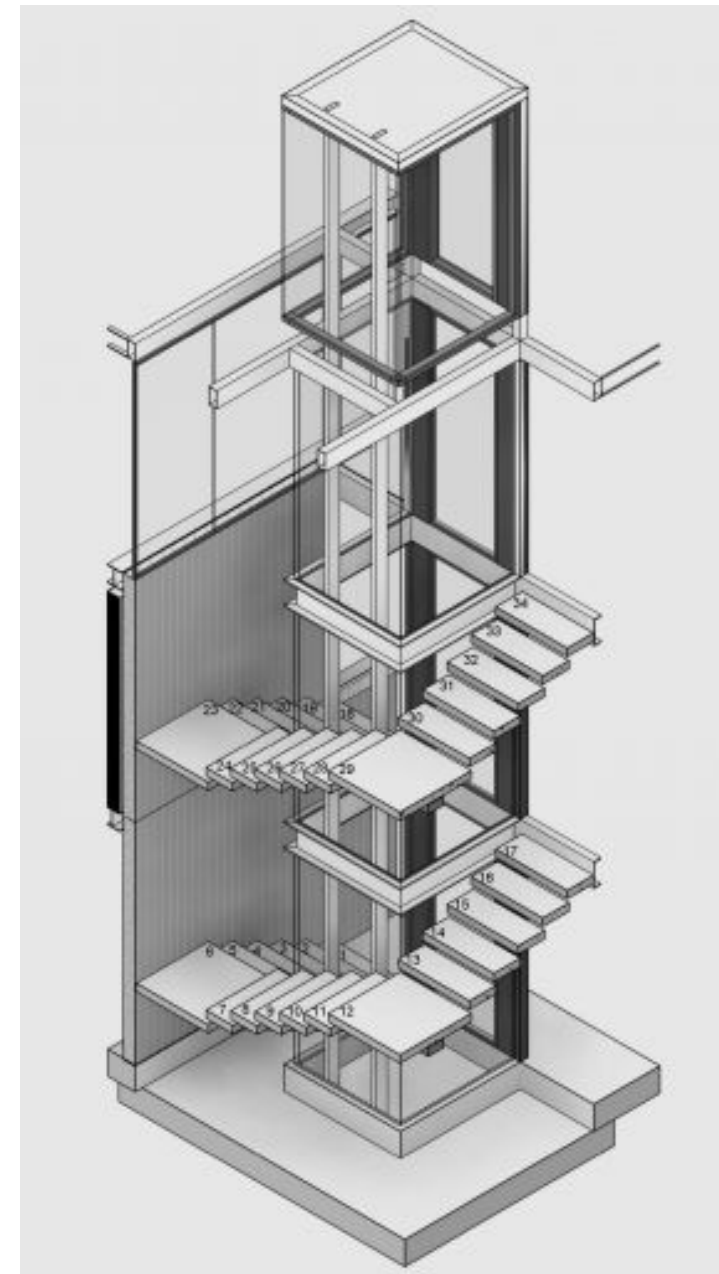

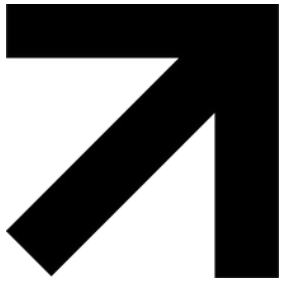

Remote Monitoring and Diagnostics (RM&D) for lift provide key benefits by improving maintenance and performance. RM&D allows real-time tracking of lift systems, detecting issues early and reducing downtime and costs with predictive maintenance.

It enhances safety by continuously monitoring critical components, ensuring smooth and reliable operation. Additionally, RM&D optimizes elevator performance, extends equipment lifespan, and improves overall service quality.

MAINTENANCE SERVICES

Lift maintenance is a critical process to ensure the safety, reliability, and efficiency of elevators. It involves regular inspections, testing, and servicing of the lift components.

Maintenance Services

Regular Inspections

Routine Checks:
Scheduled visits to look for wear and tear.

Operational Testing:
Make sure the elevator runs smoothly and stops accurately.

Safety Device Checks:
Ensure emergency brakes, alarms, and lights work.

Component Servicing

Lubrication:
Keep moving parts well-oiled.

Adjustments:
Fine-tune doors, brakes, and controls.

Cleaning:
Remove dust and debris from the shaft and machinery.

Callback Service

24/7 Availability:
Services to attend issues anytime promptly.

Rapid Response:
Technicians are quickly dispatched to diagnose and fix problems.

Emergency Handling:
Prioritizes emergencies like trapped passengers or major malfunctions.

Repairs and Replacements

Replace Worn Parts:
Change cables, pulleys, and electronics as needed.

Upgrades:
Implement improvements for safety and efficiency

Annual Load Test and Inspection

To engage a Specialist Professional Engineer (SPE) and jointly conduct no-load/ full-load test

and examination as per BCA prevailing standards for annual PTO renewal.

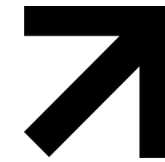

Maintenance Program

5 YEARS WARRANTY*

For controller, traction machine and hoisting ropes.

*Terms and condition applies

Standard Program

04 site visits annually.
12 site visits annually.

24hr unlimited callback emergency assistant.

Load test inspection for PTO renewal annually.

Comprehensive Program

04 site visits annually.
12 site visits annually.

24hr unlimited callback emergency assistant.

Load test inspection for PTO renewal annually.

All-inclusive repairs except for selected items.

Predictive Maintenance

Connect your elevator to our IoT-enabled system for Remote Monitoring and Diagnostics (RM&D), allowing real-time tracking of lift operations. This integration detects issues early, reduces downtime, and lowers costs through predictive maintenance.

Artificial Intelligence (AI) assists in predicting future failures, enabling early intervention with proactive issue resolution before breakdowns occur.
